

CVISION's PdfCompressor for Kofax Capture

Optimize PDF files within your Kofax workflow

CVISION's PdfCompressor for Kofax Capture creates super-compressed (100x), web-optimized PDFs, with full multi-threaded support for color capture and high accuracy OCR based text extraction.

CVISION's PdfCompressor for Kofax Capture works to provide:

- Color output up to 100x smaller and black & white up to 10x smaller than typical Kofax Capture output
- Documents that are text-searchable with super-accurate OCR
- PDF/A compliance for reliable document archiving
- Higher accuracy for forms processing using color capture
- Web-optimized documents, Bates stamping, headers/footers
- High speed, multi-directional OCR in 60+ languages
- Customizable document metadata
- Image processing: auto-rotation, auto-inversion, auto-smoothing, auto-cropping
- Auto-proofing of the document conversion process
- Files that can be emailed and transmitted with ease and speed
- Files viewable by anyone using Adobe's Standard Reader—no special plug-ins required!

Control PdfCompressor through Kofax Capture:

- Choose OCR settings based on speed or accuracy
- Choose between Lossless or Perceptually Lossless Compression Modes
- KCM module runs as a service for automated, unattended processing
- Multi-threaded processing support for maximum CPU utilization
- Select PDF Acrobat version compatibility
- Auto-segmentation for color pictures
- Deskew, Rotate, and Invert documents
- Control print output page dimensions
- Secure documents with passwords and 128-bit encryption

Ideal for large scale document imaging conversion projects.

Compatible with all release scripts that support Kofax Capture.
